Newmont Sustainability Report 2006

Welcome to Newmont's fourth annual Global Sustainability Report. For the first time, we are presenting this information in a web-based format enabling us to more broadly communicate about our social, environmental and economic contributions and impacts.

Contributing to the sustainability of a community is fundamental to who we are and how we do business. Here you will find Newmont's approach to sustainability, as well as highlights of our programs and progress we have made to strengthen community relations, environmental stewardship, worker health and safety, and employee well-being.
